MY OPEN-SOURCE WORK PROJECTS

Crud table functionality with PHP 🔗 **Online products**

Developed a fully functional CRUD table system in PHP to allow users to Create, Read, Update, and Delete records from a database.

Implemented a secure login system using PHP sessions and hashed passwords to authenticate users.

Implemented a search feature in the CRUD table to allow users to filter records based on specific criteria.

Myntra Clone   **Myntra clone**

A Designed semantic HTML5 layouts with sections for navigation, product listings, product details, and user authentication.
Utilized CSS for styling the page.

Integrated the Fetch API to retrieve product data from a backend server or a public API and dynamically display the product catalog on the front-end.
